

**Annual Report
July 2023**

Following is the review of the Goals & Objectives for July 1, 2022 to June 30, 2023:

Goal # 1: Develop and provide Suboxone at our Lancaster location

- The Lancaster location has developed and began providing suboxone services to eligible clients. The program requires participation in Med Management, Outpatient SUD Services and Care Coordination Services. The Lancaster Location is working to expand their Suboxone services to include more clients in need of MAT.

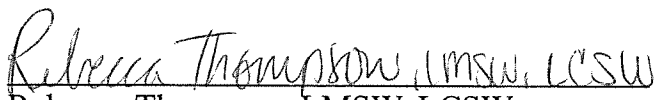

Goal # 2: Expand SUD staff to include additional therapists. Hire and train therapists. Maintain the appropriate DDAP client to therapist ratios.

- Each site was able to grow in the number of therapists. This goal will be continued because we are working to continue to grow in each location.

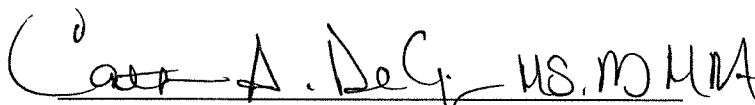

Goal # 3: Develop and expand the Recovery Specialist programming within the community and throughout the facility.

- PBH continues to work on expanding Care Coordination services in our Lancaster County Office. Policies and procedures have been updated, as needed, to best guide care coordinators in their position. PBH's Harrisburg Location plans to begin offering CRS services beginning in July 2023
